# NETCETERA HAVE TEAMED UP WITH BUGSCORE 360

OCTOBER 2, 2014 | DAVID | LEAVE A COMMENT

Netcetera are delighted to announce that we have teamed up with Bugscore 360, a web-based software that allows your company's employees to score each other in real-time.

## What is a 360 Review?

If you have a team (small or massive) and you want to optimize and monitor their performance and see how they compare, you would conduct a 360 review. This full circle, 360 review provides feedback from peers, superiors, subordinates, customers and suppliers and helps the employee and management better understand their strengths and weaknesses: Great for coaching employees toward better performance, determining bonuses and promotions.

## Problem

Most 360 review systems use surveys that take too long, or they are qualitative and hard to tally, and there is no real-time feedback (helps your organization "self-correct"). Until now...

## Introducing

Bugscore 360, The World's First Real-Time 360 Review Scoring System. Bugscore 360 is brought to you by the same group that produced Bugscore, the world's #1 scoring application used to score over 37,000 businesses, 2,423 companies, 92,360 products by over 400,000 people.

## Reasons to Buy

---

There are FIVE main reasons to consider Bugscore 360:

- Quick to complete, real-time or scheduled (90% quicker to complete which means you can use it more frequently)
- Produces qualitative *and* quantitative results (world's ONLY real-time scoring)
- Provides direct and frequent real-time feedback (see scores in seconds)
- Easy to monitor over time – track improvements (big data insights others cannot show)
- Can change culture and increase performance

There's a lot more, but watch the short but exciting video to see how to do a 360 review with Bugscore 360.

## Pricing

Bugscore 360 cost from \$1.00 to \$5.00 per month per employee for 360 reviews any time, dramatically less than alternatives.
